

## **BEST WORK EXPERIENCE SUPPORT SCHOOL GNYANDHAM**

We had our Commerce Ingenuity Inter School Competition for business plan. Under the guidance of Snehal Teacher and Dhvani Teacher, we made seed paper which was presented as our product in the competition. We used scrap materials from GDS Art Studio for making seed paper.

I decided to use this idea in the workshop which I conducted in summer vacation. I taught kids to make seed paper and then to use the same for planting purpose.

We made over 13-15 planter from used plastic bottles in which we planted our seed paper.

This was a good hands-on experience in the area of entrepreneur skills.

Our product- seed papers which now turned into saplings is my contribution in saving the environment (small CSR activity by an entrepreneur).

I earned a handsome amount from my workshop and I used it to self-finance my Diwali School Tour. As a commerce student, it's really a great thing for me.

I am a little Entrepreneur now!

All credit goes to my school and I am thankful to my principal Mrs. Achala Joshi for organising such innovative competitions for us.
